TITLE: TERMINAL FOR STAY-AT-HOME BETTING

PUBN-DATE: October 26, 1989

INVENTOR-INFORMATION:

NAME

HIRASAWA, YOICHI

HOSOMI, MIKIO

INT-CL\_(IPC): G06F015/28

ABSTRACT:

PURPOSE: To give the presence to a better by informing of the reduction of the deposit remainder at the time of betting and the increase of the deposit remainder at the time of hitting at real-time.

CONSTITUTION: The title terminal is composed of a teletext processing part 12 to receive a teletext, process character data concerning a race and display the result at the picture of a television 14, and a betting processing part 13 to process the information concerning the betting inputted from an input device 15 and execute the betting of a race through a telephone line network 16 to a promotor side center 17. By the inquiry from a better, a balance calculating part 18 informs of the reduction of the deposit remainder at the time of betting and the increase of the deposit remainder at the time of hitting at real-time. Thus, the same presence as the one to purchase a betting ticket by himself at the selling window of a stadium can be given to the better.
